

Infection Control

Shore Medical is committed to the control of infection within its practice buildings and in relation to the clinical procedures carried out within them.

Our GP's and Nursing Staff follow our Infection Control Policy to ensure the care we deliver and the equipment we use is safe.

We take additional measures to ensure we maintain the highest standards:

- All staff complete annual Infection Control training modules
- Annual and monthly Infection Control Audits
- Review our policies and procedures
- Maintain premises and equipment ensuring all reasonable steps are taken to reduce or remove all infection risk
- Use washable or disposable materials for items such as soft furnishings and consumables, e.g. seating materials, couch rolls, bed curtains, floor coverings & towels etc, and ensure that these are laundered, cleaned or changed frequently to minimise risk of infection.
- Provide alcohol hand gel throughout the building
- High touch areas are wiped down regularly throughout the day
